DESCRIPTION: OTEK's new HI-Q111™ series of serial input remote displays are 100% compatible with any HI-Q series controllers or any device with RS232C, USB or RS485 protocol ASCII character output.

The individually addressed segments of each digit allows you to generate limited alpha characters and all numerals (0-9) plus decimal points.

Baud rate is software programmable (9600 Std.) and address is jumper selectable or software programmable. The HI-Q111 has an LED on the upper left corner that can be addressed as sign, over-range or alarm. All connections are made through screw terminal connectors.

The HI-Q111 can be powered by 5VDC±5% or isolated 6-32VDC (or 24VAC) or 90-265VAC power supply.
