DESCRIPTION: OTEK's new HI-Q112™ series of serial input remote displays are 100% compatible with any HI-Q series controllers or any device with RS232 or RS485 protocol ASCII character output.

The individually addressed segments of each digit allows you to generate limited alpha characters and all numerals (0-9) plus decimal points.

Baud rate is software programmable (9600 Std.) and address is jumper selectable or software programmable. The HI-Q112 has an LED on the upper left corner that can be addressed as sign, over-range or alarm. All connections are made through screw terminal connectors.

ANALOG INPUT We can include (on request) a 16 Bit A/D. Contact OTEK.

The HI-Q112 accepts 5VDC ±5%; 6-32VDC or 90-265VAC power input and its front is NEMA4 rated.

Model can be ordered in explosion proof housing for hazardous environment applications. The internal design of the units allows for custom features such as analog inputs, digital inputs and serial I/O. Contact OTEK with your requirements.
